SUMMARY

Third-year B.Tech AI student building LLM applications with LangChain and LangGraph. Live multi-agent project at sahil.page. Comfortable across the GenAI prototyping stack and classical Looking for a GenAI internship to go deeper On RAG.

EDUCATION

JD College of Engineering and Management

Nagpur, India

B.Tech in Artificial Intelligence — CGPA 8.35 / 10.0

Aug 2024 – May 2028 (Expected)

- Coursework: Machine Learning, Probability & Statistics, Linear Algebra, Data Structures & Algorithms, DBMS, Data Visualization.

TECHNICAL SKILLS

GenAI & LLMs: LangChain, LangGraph, Ollama (local LLM), prompt engineering, multi-agent workflows, Tavily Search, FastAPI for LLM serving.

Languages: Python, SQL, C++.

ML & Data: SHAP, SMOTE, Pandas, NumPy, Matplotlib, Streamlit.

Computer Vision: OpenCV, MediaPipe.

Web & Tooling: Tailwind CSS, Git, GitHub, REST APIs.

PROJECTS

Quick Wiki Research Assistant | LangGraph, LangChain, FastAPI, Tavily, Python

[Live Demo](#) | [GitHub](#)

- Shipped a multi-agent research assistant on LangGraph that turns a single topic prompt into a sourced report with citations.
- Spawns AI analyst personas with distinct expertise, runs Wikipedia and Tavily searches in parallel, then synthesizes findings via state-managed iterative refinement.
- Live demo serves real traffic; backend instrumented for token usage and per-step latency.

Plan4U — Local LLM Study Planner | JavaScript, Ollama, Prompt Engineering

[GitHub](#)

- Built a privacy-first study planner that runs an open-source LLM locally via Ollama — no data leaves the user's device.
- Designed structured prompts to extract course metadata, learning outcomes, and deadlines from unstructured syllabus text and produce a personalized weekly plan.

Customer Churn & Behavioural Analytics | Python, XGBoost, SHAP, SMOTE, Streamlit

[GitHub](#)

- Built an attrition-risk classifier on ~10,000 customer records and reached **F1 = 0.88** after addressing class imbalance with SMOTE oversampling.
- Used SHAP feature attributions to surface the strongest churn drivers (contract type, tenure, monthly charges) and translated them into retention recommendations.
- Wrapped the model in a Streamlit dashboard with cluster-level segmentation and a high-risk customer view.

Focus Guard — CV-based Pomodoro Timer | Python, OpenCV, MediaPipe

[GitHub](#)

- Real-time desktop app that monitors user attention during focus sessions using MediaPipe head pose and Eye Aspect Ratio (EAR) for drowsiness.
- 1st Place, Mini Project Exhibition 2025** — pauses sessions automatically when attention drops below threshold.

ACHIEVEMENTS

- 1st Place** — Mini Project Exhibition 2025, JD College of Engineering (*Focus Guard*).
- Selected as Resume Workshop Facilitator and Peer Mentor at JDCOEM (2025 – present).

CERTIFICATIONS

- Kaggle Learn** — Intro to Machine Learning + Intermediate Machine Learning (data analysis, feature engineering, model tuning).

LEADERSHIP & VOLUNTEERING

National Service Scheme (NSS)

2024 – Present

Education Volunteer & STEM Mentor

- Mentor underprivileged school students; break down STEM concepts for non-technical audiences — core practice for technical communication.
