SUMMARY

Third-year B.Tech AI student building LLM applications with LangChain and LangGraph. Live multi-agent project at sahil.page. Comfortable across the GenAI prototyping stack and classical ML. Looking for a GenAI internship to go deeper on RAG.

EDUCATION

JD College of Engineering and Management

Nagpur, India

B.Tech in Artificial Intelligence — CGPA 8.35 / 10.0

Aug 2024 – May 2028 (Expected)

- Coursework: Machine Learning, Probability & Statistics, Linear Algebra, Data Structures & Algorithms, DBMS, Data Visualization.

TECHNICAL SKILLS

GenAI & LLMs:	LangChain, LangGraph, LangSmith, Ollama (local LLM), OpenRouter API, prompt engineering, multi-agent workflows, Tavily Search, FastAPI for LLM serving.
Languages:	Python, SQL, C++.
ML & Data:	Pandas, NumPy, Matplotlib, Streamlit.
Computer Vision:	OpenCV, MediaPipe.
Web & Tooling:	Flask, Playwright, Tailwind CSS, Git, GitHub, Vercel, REST APIs.

PROJECTS

Quick Wiki Research Assistant | *LangGraph, LangChain, FastAPI, Tavily, Python*

[Live Demo](#) | [GitHub](#)

- Shipped a multi-agent research assistant on LangGraph that turns a single topic prompt into a sourced report with citations.
- Spawns AI analyst personas with distinct expertise, runs Wikipedia and Tavily searches in parallel, then synthesizes findings via state-managed iterative refinement.
- Live demo serves real traffic; backend instrumented for token usage and per-step latency.

MARK — AI Marketing Poster Studio | *Python, Flask, OpenRouter, Playwright*

[Live Demo](#) | [GitHub](#)

- Built a conversational campaign assistant that turns a plain-language brief into three marketing-copy options, an art direction, and a downloadable social poster.
- Designed prompts to gather brand, focus, objective, and audience through chat, and pull colour cues from an uploaded logo to drive the poster palette.
- Rendered posters to PNG with Playwright and stored them per user in private Cloudflare R2 behind Google Sign-In, served through short-lived presigned URLs.

Focus Guard — CV-based Pomodoro Timer | *Python, OpenCV, MediaPipe*

[GitHub](#)

- Real-time desktop app that monitors user attention during focus sessions using MediaPipe head pose and Eye Aspect Ratio (EAR) for drowsiness.
- 1st Place, Mini Project Exhibition 2025** — pauses sessions automatically when attention drops below threshold.

ACHIEVEMENTS

- 1st Place** — Mini Project Exhibition 2025, JD College of Engineering (*Focus Guard*).
- 1st Runner-Up** — Designathon 2K26, JDCOEM (gamified job-application dashboard for freshers).
- 2nd Place** — Blind Coding Challenge (JDCOEM TechFest) and Emoji Coding Competition.
- Selected as Resume Workshop Facilitator and Peer Mentor at JDCOEM (2025 – present).

CERTIFICATIONS

- Kaggle Learn** — Intro to Machine Learning + Intermediate Machine Learning (data analysis, feature engineering, model tuning).

LEADERSHIP & VOLUNTEERING

National Service Scheme (NSS)

2024 – Present

Education Volunteer & STEM Mentor

- Mentor underprivileged school students; break down STEM concepts for non-technical audiences — core practice for technical communication.

College Annual Festival, JDCOEM — Professional Anchor

- Hosted the flagship annual event for a large, diverse audience, managing live transitions with tech crews.

Avinya Forum School Visit — Digital Literacy Initiative

- Introduced school students to computers and digital literacy through hands-on activities.
